

Both the social media stand and company display stand are visually appealing and easy to read.

Social Media Stand

In line with our ethos of 'cultural diversity', we have used a traditional 'Ikat' tablecloth from Uzbekistan (supplied by a member of the team).

Our product line is clearly displayed on this rotating stand – all products can be viewed equally and safely without touching them (COVID friendly). Having only one set of products on our stand (and the others stored below), means that our stand is clutter-free, clean and approachable.

Through the integration of an iPad (supplied by a team member), customers are able to view our website for more details, and read our culture and self care blog posts (written by members of our team). They also have the option to order our product via our online store if they prefer.
