

# Personal Site Proposal

## Mission:

A website to showcase my personal projects in design and engineering

## Audience/s:

Potential hirers from companies/start-ups/clubs, or customers

## Content:

Personal projects in design and engineering

## Graphics:

I want to keep the background graphics pretty minimal and simple.

## Design and style:

Clean, professional but still with a unique style. Pastel and simple colour scheme with an interesting font. I'd like to incorporate some moving elements.
